Rafaela,

The EPA portion of their budget is only \$50K of the \$143K and so it might be that that an amendment would only be needed if the 10% change would pertain to changes in the EPA's \$50,000 portion, but I don't know that for sure. There is an OGD office hour from 2 to 3:30PM today where we could get this question answered pretty quickly. I forwarded the series to you. I can join at 3:00 to see what they say as I am interested in the answer. Can you join at 3?

For the funding opportunity she mentions, it is a competitive grant that will be released next month if it comes out when anticipated. And no I can't meet one on one with folks about that grant because it will be competitive. I will mention that to her.

Rafaela - I apologize for not having gotten back to you sooner! We have been working through some budget changes prior to submitting our extension request, and I wanted to confirm something we discussed previously. You had mentioned that if our overall budget were to grow by more than 10% of the original amount, which was \$143,000, the process for reviewing/approving our extension request would be more complicated, but I could not recall the details of what the implications would be. It is looking like we will need to exceed the original budget by approximately 15%, but I did not want to submit the extension request with this information until I first understood what this would entail.

Barbara - During the recent coalition meeting we held at Southface you mentioned that there may be additional funding opportunities that LBC could pursue for this project; would it be possible for us to set up a time in October to discuss this further?

Thank you!

Shannon

Shannon,

Thank you for sending this over. When you get a chance could you provide a justification in writing (e-mail is fine) for the extension request and an outline of the specific activities in the budget that the remaining EPA funds will be used for?

Thank you and we can touch base in October as originally planned.

Rafaela

Subject: documents for tomorrow's call

Rafaela - Please find enclosed the following documents for our meeting tomorrow afternoon:

- Deconstruction Ecosystem design process overview (Mother's Tongue)
- Updated project work plan
- Updated project budget (9.6% increase from original budget estimate of \$143,000)
- Sample summary document from Reuse Toolkit data gathering effort

We would also like to discuss with you tomorrow the possibility of having an EPA representative participate in some of our planning activities, and we are hoping that you, Barbara and Kim will be able to join us for LBC's annual event at the Kendeda Building on October 18th. Please let me know if you'd like to attend so we can get you registered; more information about the event can be found on our website here:
